

Route Groups

Work-flow to Use Route Groups

- » Use **Add Preference** to obtain a baseline dialog that sets a named Route Group
- » Repeat **Add Preference** for additional instances of the baseline dialog

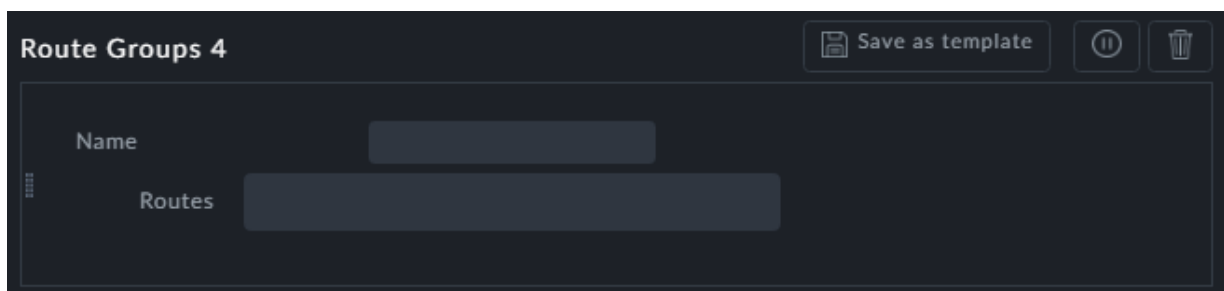

Preference Overview

This preference sets up named Route Groups.

Add Preference Dialog

Prerequisites: None.

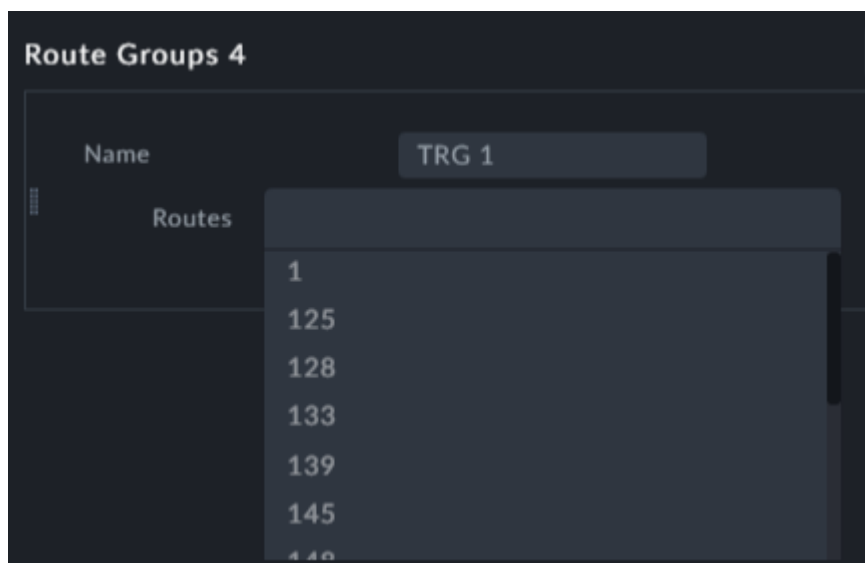

Opening Dialog:

The screenshot shows a dialog box titled "Route Groups 4". In the top right corner, there are three buttons: "Save as template", a pause button, and a delete button. The main content area contains two input fields. The first field is labeled "Name" and is empty. The second field is labeled "Routes" and is also empty.

Points to note:

- » **Name:** Enter a name for the group. The name will be used in reports. Further, they will be available by name to preferences requiring Route Groups.
- » **Routes:** You will be shown a drop-down list of available routes.

This screenshot shows the same "Route Groups 4" dialog box, but the "Routes" dropdown menu is now open. The "Name" field contains the text "TRG 1". The dropdown menu displays a list of route numbers: 1, 125, 128, 133, 139, 145, and 148.

Choose as many as you need by clicking them.

» You may use **Add Preferences** to create additional Route Groups
