

Duty ID Generator

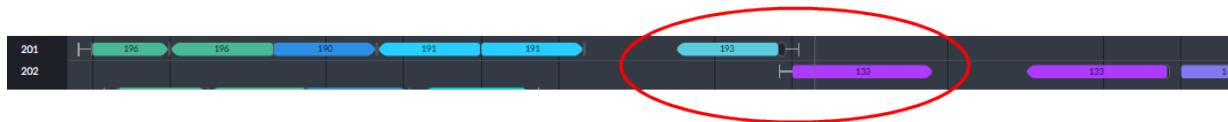

Work-flow to Use Duty ID Generator

The Duty ID Generator preference is accessed through **Load Template** and only one instance of it is permitted.

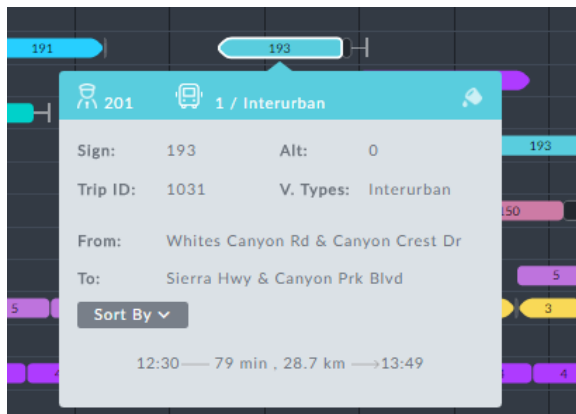

Preference Overview

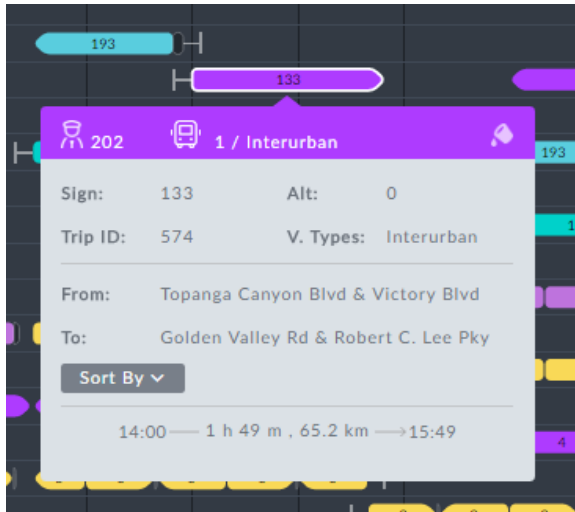

If this preference is left unchecked, duties (Driver blocks) in the Driver Gantt will be numbered sequentially from 1.

If the preference template is used, the optimizer will try to number the driver duties so that successive duties using the same vehicle appear consecutively. Here is an example:

The circled service trips use the same vehicle as shown in their information boxes below:

Templates Available from Optibus

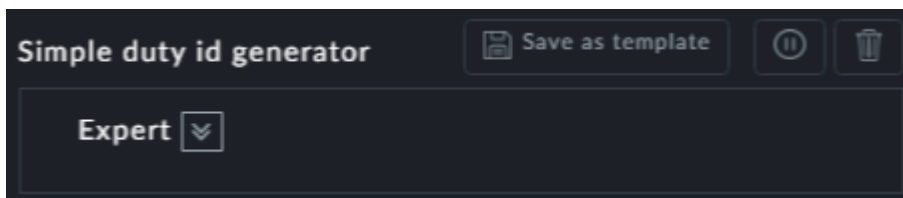

Simple duty id generator

Purpose:

As stated in the Overview

Prerequisites: None.

Opening Dialog:

Point to note:

- » There is nothing further to do here - just click **Save** and continue
- » This preference functions as a toggle. To untoggle it, you must re-enter the preference and use the  button

Note

The Duty ID Generator can be tailored to customer requirements. For example, an operator might require 1-200 to be duties that share a vehicle, 400-500 to be duties that do not share a vehicle, 600-700 to be split duties and so on...
