

# Vehicle Standby Limitation

## Work-flow to Use Vehicle Standby Limitation

The Vehicle Standby Limitation preference is accessed through **Load Template** and only one instance of it is permitted.

## Preference Overview

The Vehicle Standby Limitation preference sets a vehicle standby time range for which vehicles may not be in use. The  range is just a minimum to a maximum time with a possible penalty for violation. It is a vehicle load balancing device.

## Templates Available from Optibus

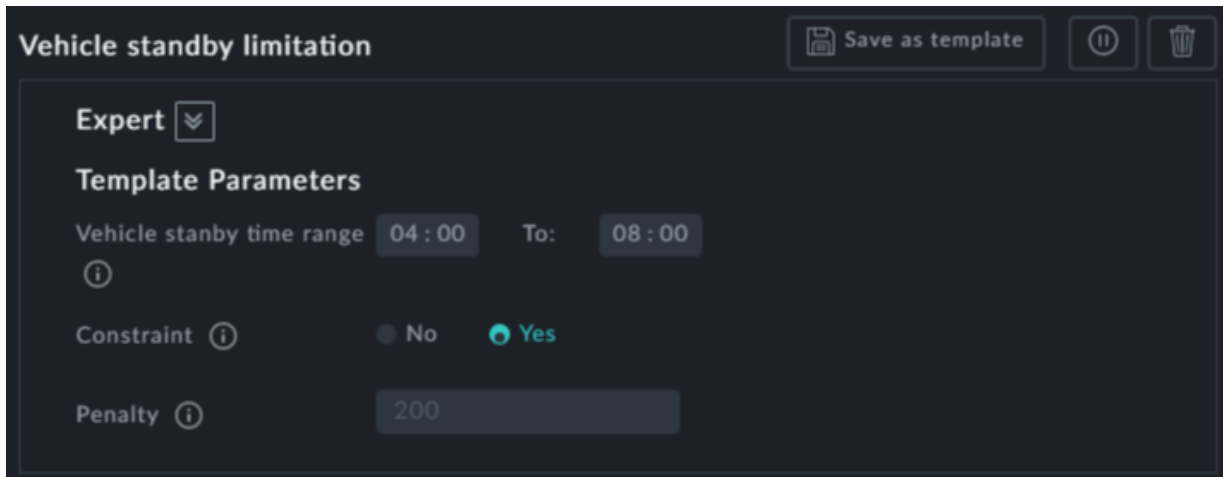

### Vehicle standby limitation

#### Purpose:

Sets the standby period with an optional penalty for violation.

**Prerequisites:** None.

#### Opening Dialog:

#### Points to note:

- » **Vehicle standby time range:** The **Vehicle standby time range** is a  minimum stanby time to a maximum standby time.
- » **Constraint:** The upper limit of the standby time range can be made a constraint by setting **Constraint** to Yes.
