

Vehicle Types

Preference Overview

The Vehicle Types preference is based on customer data, which includes vehicle replacement rules.

Vehicle replacement means one vehicle type can perform trips assigned to another vehicle type. The possible replacements for a vehicle can be seen in any Vehicle trip information box 

A screenshot of a mobile application interface showing vehicle trip information. The top bar is blue with a person icon and the number 4521 on the left, a bus icon and the text '10901 / SUNSET 40 FT CNG' in the center, and a location pin icon on the right. Below this, the background is light gray. The text 'Sign: 217' is displayed. Below that is 'Trip ID: 357589191'. Then 'V. Types: SUNSET 40 FT CNG, SUNSET 40 FT DIESEL, SUNSET 40 FT HYBRID'. A horizontal line separates this from the route information: 'From: Lake Mead Pkwy @ Boulder Hwy (E)' and 'To: Dean Martin @ Silverton (N)'. Below the route is a 'Sort By' button with a downward arrow. Another horizontal line follows. The trip duration and distance are shown as '06:51 — 1 h 37 m , 27.4 km —> 08:28'. At the bottom, there is a dark bar with five blue buttons, each containing the number '217'. The third button from the left is highlighted with a white border.

For the moment, there is no baseline preference and there are currently no templates.
