

# Deadhead Catalog

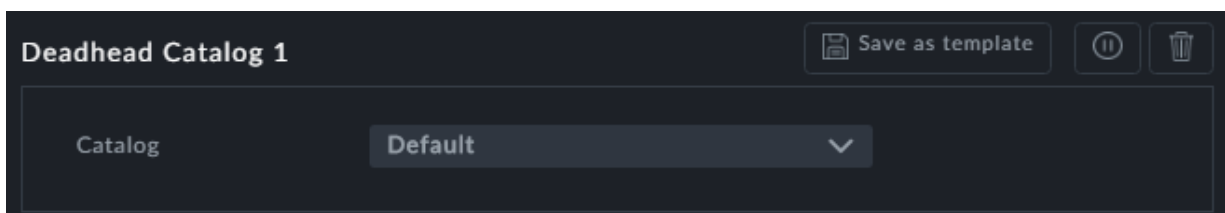

## Preference Overview

This preference enables you to add to the loaded schedule a previously imported deadhead catalog. The preference is accessed using Add Preference. There are no templates.

## Add Preference

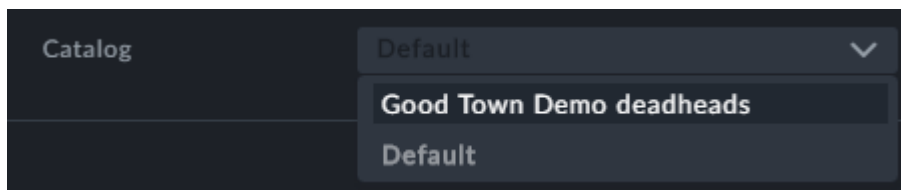

**Prerequisites:** You should have one or more imported deadhead catalogs.

**Opening Dialog:**

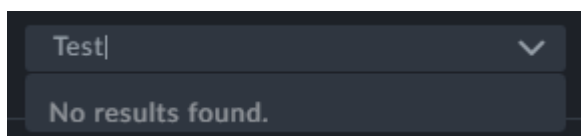

**Points to note:**

- » **Catalog:** Clicking the Catalog field opens a list of available catalogs:

- » Alternatively, you can enter the name of a catalog by hand. If it does not exist you will be told:

- » You may also choose Default, to choose the default catalog built into the Dataset, if any
- » Your chosen catalog will be used at the next and subsequent optimizations

**Tip**

In the absence of a Deadhead Catalog, you can use the **Deadheads Generator** to generate deadheads.
