Depot Capacity

Work-flow to Use Duty Types

» Use **Add Preference** to obtain a baseline dialog that sets Duty Types

» Repeat **Add Preference** for additional instances of the baseline dialog

Preference Overview

This preference defines depot locations and there parking capacity, whether global or by Vehicle Type.
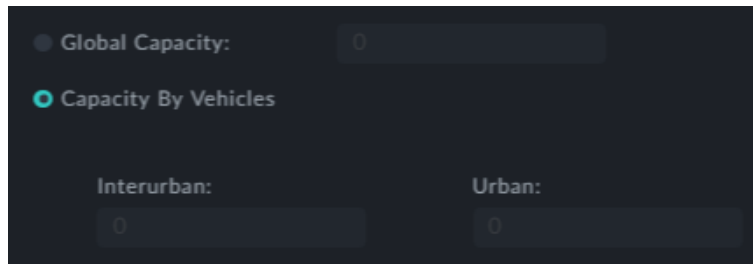

Add Preference Dialog

Prerequisites: None.

Opening Dialog:

Points to note:

» **Stops**: Stops is a drop down list of stops that can be used as "depots". You may only choose one.

» Use **Add preferences** again to add further stops as depots.

- The **End Day** and **Mid Day** switches: These determine whether the chosen stop can be used as an end-day and/or mid-day depot
- **Branch ID** is an optional depot name or ID of your choice
- **Capacity** is the number of vehicles that may be parked in the depot. You have a choice between -
  - **Global Capacity**: A single figure vehicle capacity
  - **Capacity by Vehicles**

  - Yo may enter vehicle capacity by Vehicle Type

> 📝 **Note**
> Vehicle Type is customer defined. You will see your own Vehicle Types here.
