# Deadheads Generator

## Preference Overview

The Deadheads Generator preference is an internal device to calculate and complete deadheads missing from the Deadhead Catalog.

> **Note**
> » The deadheads calculation algorithm for the Generator can be supplied by the customer
> » Deadhead, pull out or pull in icons in a Gantt having a white dot in the center, for example like this, ⬤ are auto-generated by the system based on this preference

Here is an example of a Vehicle Gantt with generated deadheads:

For the moment, there is no baseline preference and there are currently no templates. It may be implemented in Expert Mode by Optibus Professional Services.
